GOAL

To develop an University Admission Predictor by analysing the different facotrs that impact admissions into a graduate college

PROBLEM STATEMENT

Students are always see about their chances of admission to get into a University.

The aim of this project is to help students in shortlisting universities with their profiles.

The predicted output gives them a fair idea about their admission chances in a particular university.

This Project should also help students who are currently preparing or will be preparing to get a better idea about the future which they are involved in.

Data vizualization

different gender of admissions in different years

find the university with most acceptance rate

percentage of people pursuing master and idea of working after masters

Average TOEFL , GRE scores required to intake by universities

ARCHITECTURE
